 **Speed Queen[®]**

here's a pleasant surprise"

Over 100 years of laundry expertise

Say hello to Speed Queen, America's favourite home laundry. Based in Ripon WI, USA, we began producing the industry's most trusted, highest performing laundry equipment in 1908. We've been dedicated solely to laundry ever since.

Speed Queen is from Alliance Laundry Systems, the world leader in commercial laundry. All Speed Queen machines feature commercial laundry technology that's built to deliver professional results in your home for decades.

Made in USA

2014 - 2017

WOMEN'S CHOICE AWARD[®]
AMERICA'S MOST RECOMMENDED
LUXURY WASHER & DRYER

Washers and dryers most trusted by American women

From 2014 to 2017 Speed Queen quality has been recognized with the America's Most Recommended Luxury Washer and Dryer Brand award.

For the Women's Choice Award thousands of women across America were asked to select the brands they would most highly recommend to family and friends. The initiative aims to set the standard for helping women make smarter purchasing choices. Awards are based on surveys, as well as research conducted in partnership with the Wharton School of the University of Pennsylvania.

Built to last up to 25 years

QUALITY ASSURED, SUPER DURABLE MACHINES

Speed Queen laundry equipment is manufactured in the United States. Our powerful yet gentle machines are made from premium quality materials.

We apply strict quality checks and test our machines for up to 10,400 cycles – at 8 cycles per week, that's 25 years of fresh clean laundry.

LIFETIME WARRANTY
ON STAINLESS STEEL
DRUM / 5 YEARS ON
TRANSMISSION

Fresh clean laundry wash after wash

LEGENDARY LAUNDRY QUALITY AND INNOVATION

Your ultra-modern Speed Queen washer is the result of over 100 years of dedication to laundry equipment innovation and quality.

Through decades of ongoing research we've developed an unmatched understanding of how to build washers that clean and care for fabrics on a commercial scale. Speed Queen brings that professional quality into your home.

EXTRA LARGE CAPACITY

Speed Queen machines can wash a huge load with ease. Curtains, bedding, rugs, car seat covers, plush toys.... Pile them all in. With Speed Queen your whole home will always be fresh and clean and smelling good.

POWERFUL AND GENTLE

Speed Queen's powerful drive and sophisticated mechanical action ensures maximum water-to-laundry contact for optimum results. The smooth and rigid stainless steel washing drum prevents wear and tear on fabrics.

Top load washer washes clothes cleaner without tangling – In wash mode the 210 degree agitator operates at 68 strokes per minute forcing more water through fabrics, and drawing the fabric through more water (LWN311SP model).

Revolutionary front load washer balancing system – Improved suspension with new out-of-balance logic manages and redistributes unbalanced loads for uninterrupted wash cycles (LFNE5 model).

SMART

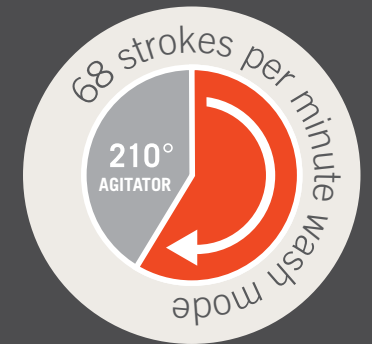

Multiple programs and advanced logic deliver the perfect balance of energy savings and cleaning power.

The electronic control panel keeps you informed throughout the laundry process with cycle status lights and a digital countdown.

You have complete flexibility to control temperature, spin speeds, and soil levels. You also get Pre-Wash and Additional Rinse options for maximum efficiency.

Large capacity dryer

FRESH AND DRY FASTER THAN EVER

Speed Queen dryers are big, fast, quiet and cost effective. No more worries about humid weather and outside contamination spoiling your laundry.

Speed Queen runs on gas so you save a lot on your energy bills compared with electricity. Gas heats up instantly too so less energy is used to start the cycle. Gas dryers have a shorter drying cycle because clothes dry quicker. That means less wear and tear on your clothes and the machine.

Speed Queen dryers are built to the same exacting standards as all our laundry equipment. You can look forward to many years of fast, fresh laundry in your home with Speed Queen.

ENERGY EFFICIENT

Speed Queen dryers feature multiple technologies designed to save energy and money. Our cutting-edge Eco Cycle applies an advanced heating algorithm to conserve energy while achieving optimal dryness.

DRYING SMARTER WITH MOISTURE SENSING

Moisture sensing detects when the load reaches the dryness level you select, and a cooling cycle kicks in. This reduces unnecessary drying, lowers utility costs and protects your clothes – exactly what you'd expect from one of the industry's most efficient dryers.

Choose Wrinkle-Free mode and reduce ironing time. Or select High-Temperature mode to kill dust mites and bacteria. It's ideal for infants' and children's clothing and bedding, and helps prevent allergies.

A MORE THOUGHTFUL DESIGN

You'll appreciate our uncompromising approach to dryer design. The reversible hinge door opening is the largest in the industry, providing easy loading and unloading.

Our dryers also feature a clever drying rack for delicates, shoes, soft toys and other items unsuitable for tumbling.

THE PERFECT DRY, EVERY TIME

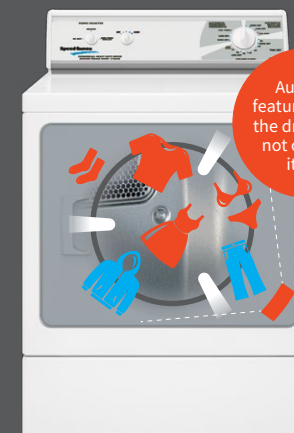

Speed Queen dryers deliver superior results fast by achieving the ideal balance between drying temperature, airflow pattern and mechanical action.

Innovations include a heavy-duty fan system, and an advanced airflow pattern to maximize hot air distribution around the cylinder. You get the perfect dry for a fresh clean home.

ENERGY EFFICIENT GAS DRYER

ECO CYCLE TECHNOLOGY

Auto dry feature ensure the dryer does not over dry items
